

Easy to Use

Insert hands in to the sanitizing compartment. Motion sensors will activate the automatic spray, cleaning the hands with anti-bacterial disinfectant mist.

Adjustable spray duration and quantity settings.

Convenient

Multicolor LED lights signal users when disinfection has been completed.

Digital Media Screen allows display of important announcements, procedures and advertising opportunities.

Hand Sanitizer Machine

99% Effective

Rapid hand sanitizing using a hygienic no-touch application ensures full coverage on hands.

ECO-friendly solution leaves no physical waste and effectively kills 99% of bacteria, viruses and microbes.

Automatic Hand Sanitizing Module

Proper hand cleaning is an important procedure in preventing the spread of bacteria and viruses, including COVID-19. Facilities will be required to provide hand sanitizing solutions to individuals who are entering the area.

The Hand Sanitizer Machine provides a safe and effective way to disinfect hands using an automated fogging nozzle to completely sanitize the hands, killing 99% of bacteria and viruses.

Built-In digital screen and voice communication are perfect for showing instruction videos, announcements, promotions or contracted advertisements.

- Wall Mount and Free Standing Models available
- Track number of users with built-in sensor control
- Optional UV light disinfection compartment for phone and keys
